

# Mission: Health

Mission: Health is a fun and interactive e-learning program for grades K5 through 8 that helps kids establish healthy habits, increase physical activity and prevent childhood obesity.

## Student Outcomes

Students demonstrated statistically significant change. Here are some examples of their improvement:

**77%** of 4th-5th grade students could identify the healthiest fruits (an increase of 11%).

**79%** of 6th-8th grade students understood how much physical activity they should get (an increase of 12%).

**73%** of 6th-8th grade students understood the term body image (an increase of 27%).

## Reach

## Educator Satisfaction

**93%** of 3rd grade educators felt students learned valuable information that would lead to behavior change.

**88%** of 2nd grade educators felt the program's ability to address different learning styles supported their curriculum needs.

**100%** of K5 educators felt the content was age appropriate.

"This is an excellent program that makes a difference in how the children think about their health."  
- 2nd Grade Educator
